

ABSTRACT OF THE DISCLOSURE

DISTRIBUTING BILLING FOR A CALL BETWEEN A CALLER AND A CALLEE

5 A method, system, and program for distributing billing for a
call between a caller and a callee are provided. Responsive to
receiving a call request, a caller billing plan for an
authenticated identity of a caller making the call request and a
callee billing plan for an authenticated identity of a callee
10 answering the call request are identified and loaded for the call
request. Responsive to receiving a request for a billable
service with the call request, distributing a cost of the
billable service among the caller billing plan and the callee
billing plan, such that both the caller and the callee pay for a
15 benefit received from the billable service.
